Ben Bartels,

We are aware of your zoning application in with the City of Hamilton which would allow Super Sucker Hydro Vac Service Inc. to continue to operate at 623 Shaver Rd. Ancaster. We have been neighbours for over many years and have no issues with your operation in our neighbourhood.

 PETER SAMPSON *Peter Sampson* 706 SHAVER ROAD

March 30, 2011

To whom it may concern:

We, the Committee of Administration for the Ancaster Canadian Reformed Church; located on 575 Shaver Rd. in Ancaster, have been informed of the neighbouring property owners' intentions to apply for a zoning amendment. We have no issue with such intent or with the probability of the neighbouring property's zoning being amended.

Yours Truly,

Stephen Kampen;
Chairman of the Committee of Administration

March 30, 2011

Greg Males,

As you are aware as of January 1, 2011 new regulations under the Nutrient Management Act and Ontario Regulation 267/03 that govern the application of non agricultural source materials (NASM) such as municipal biosolids to agricultural land came into effect. Part of the new regulation requires operators of NASM application businesses to ensure that spills contingency plans are in place in the event of unforeseen accidents and spills. Most of these contingency plans would include a source or contact information for hydra vac equipment such as that of Super Sucker Hydro Vac. The utilization of NASM within a farmer's crop fertility program is a valuable asset not only to the farmer but to area municipalities and their citizens. Protection of the natural environment is a key component of these NASM land application programs and access to the equipment necessary to clean-up spills quickly and efficiently if they do occur is vital. The equipment that Super Sucker Hydro Vac has within their fleet is well suited to not only clean-up of a spill but also the transport of the retrieved material to a disposal or treatment location.

Regards,

A handwritten signature in black ink that reads "Michael Payne". The signature is written in a cursive style with a large, looped initial "M".

Dear Darren

We have been working with Super Sucker Hydro Vac Service Inc. since 1993. Super Sucker continues to provide Nutrient Management resources in addition to its hauling and incorporation of manure and sludge for area farmers. Proper Nutrient Management strategies are essential for the future of this industry. It is good to know that we have the ongoing use of your hydro vacs as part of our contingency plan when dealing with spills. We have a good relationship with your company and look forward to working with you in the future.

Kindest regards

Ralph Vander wal
