Subject: cul de sac on Glover Road

To Whom it may concern;

We, as a family with children residing on Glover road for more than 9 years are having major concerns the " no action" regarding the cul de sac proposal. With all the other residing neighbors (with the exception of 2) all signed a petition in favor of this cul de sac are in wonder as to 98% not being in the majority. We feel that with the huge hydro poles installed, the clearing of all the matured trees our quiet, rural neighborhood we have been enjoying is turning into nothing other than a dirty industrial throughway.(We cannot even remember the last time a sweeper has even been by to clean our dirty road, we are starting to feel that nobody cares!!!)

We were under the impression that Brenda Johnson actually worked for the community and with the city not the other way around!! In our residential neighborhood Brenda already allowed them to take hundreds of trees down as well as put up huge hydro poles. What is going to happen when they close Nebo road?

We would like nothing less than a cul de sac at either Dickenson road or at the Maple Leaf factory, not the traffic islands! Just close our road and hopefully we will receive a portion of the private, remote and safe neighborhood we once enjoyed!!

Hopefully with this being said, someone will listen,
We look forward to quick response in regards to our concerns in this matter

The Medeiros family
