Subject: Winona Scube meeting

Thank you, Brenda for providing a forum on May 23rd to allow us speak to the changes in the Winona plan.

Please bring my comments and concerns to the planning city staff and the clerk's department:

As a resident of Winona, I do not support the current density proposals as I believe there will not be sufficient infrastructure to support such high densities, such as water drainage and traffic control. Six story buildings do not represent the essence of the existing Winona community, nor the direction we wish to grow.

Also, I am quite concerned about the lack of remaining green space and negative air quality impacts of high vehicular density.

I do support the 5 km pedestrian trail and additional recreation centers.

As someone who will not be shopping at Walmart, I would like to provide other businesses the opportunity to establish themselves in the neighbourhood, rather than allowing one corporation to have dominance.

Thank you.
